ABOUT ME

Full Stack Developer experienced in Next.js, React, TypeScript, and Node.js, specializing in building multi-tenant business systems, third-party API integrations, and layered architectures with server-side validation and authorization.

TECHNOLOGIES

- **Languages:** TypeScript, JavaScript, Python, PHP.
- **Frontend:** React, Next.js, Vue.js, Tailwind, Zustand, Vite.
- **Backend:** Node.js, Express, Prisma, APIs REST, Server Actions.
- **Databases:** PostgreSQL, MySQL, MongoDB, MariaDB.
- **Testing:** Vitest, Node Native Test Runner.
- **Tools:** Git, GitHub, Docker, Postman, Firebase, Supabase.

PROFESSIONAL EXPERIENCE

Jr. Full Stack Developer | MVPX AI (Professional Internship)

Tehuacán, México

January – April 2026

Multi-Company POS Platform

- Architected backend components in Node.js for multi-tenant operations and implemented automated testing using Node Native Test Runner.
- Developed UX strategies for asynchronous states such as loading, empty states, and error handling in critical point-of-sale modules.

Fideguardian — Presta Prenda

- Developed authentication flows via OTP and account recovery using React and TypeScript.
- Optimized state management using Zustand and React Query, reducing redundant requests and improving data consistency across screens.
- Implemented business rules regarding user access and onboarding.

Co-Founder & Full Stack Developer | Nodatix

Tehuacán, México

April - July 2026

Bakery CRM - Bakery Business Management System

- Developed a multi-tenant architecture with tenant data isolation.
- Implemented a layered backend (Zod validation, Prisma repository, business logic service, and Next.js Server Actions), ensuring server-side validation and authorization at all times.
- Built client, order, payment, product, availability calendar, and operational dashboard modules on PostgreSQL.
- Integrated WhatsApp Cloud API using the Outbox pattern and HMAC-SHA256 validation.
- Reinforced PostgreSQL security using Row Level Security (RLS) and public API access role constraints.
- Developed and maintained an automated testing suite using Vitest covering services, validations, and business logic.

FEATURED PROJECTS

Evenrent – Event & Rental Management

- Web system to manage events, resources, rentals, and operations for event services businesses. (Technologies: Next.js, TypeScript, tRPC, Prisma, PostgreSQL).

NutriDev – Nutritional Management SaaS

- Developed a Progressive Web App (PWA) using Service Workers and a network-first caching strategy with offline fallback. Integrated payments via Stripe Checkout and asynchronous processing via webhooks. (Technologies: Express.js, Node.js, Service Workers, Stripe API)

EDUCATION

Associate Degree in Information Technology (TSU)

Universidad Tecnológica de Tehuacán

Tehuacán, México

08/ 2022 - 07/2024

Bachelor's Degree in Software Development and Management.

Universidad Tecnológica de Tehuacán

Tehuacán, México

08/ 2024 - 04/2026

Graduation: October 2026

CERTIFICATIONS

QA Tester Certification

Capacítate para el Empleo, Fundación Carlos Slim (2023)

Excel Certification

Testing Program (2023)

AWS Gamer to Expert Certificate

NECTEC (2023)
